Overview

The JetCon 1501 Fast Ethernet Media Converter series are designed to convert 10/100Base-TX signals to 100Base-FX signals. It greatly extends the connection range of Ethernet device to transmit & receive data via fiber cable without performance degradation.

JetCon 1501 is using store-and-forward technology in switching converter mode. It will filter out abnormal packets to keep network performance, supporting the data

forwarding rate up to 148810 pps in full wire speed. The JetCon 1501 supports auto-negotiation & flow control for 10/100Mbps connection. With the Link Loss Forwarding technology, the JetCon1501 can fast detect the broken link on RJ-45 port and forces the disconnection on the fiber port immediately. JetCon 1501 also features diagnostic LEDs, which displays power, link, speed and activity, allowing you to quickly detect and correct problems on the network.
